How Does Super Bowl Squares Work?

There are a few different ways to play NFL squares but the idea is the exact same to start.

A bettor can purchase as many squares as they wish and they add their name in one of the 100 boxes on the 10 x 10 square.

The methods range from pulling numbers out of a hat, using a number randomizer, or a handful of other methods.

Once the rows and columns have their numbers in place, bettors have the first look at what their squares look like.

The idea behind Super Bowl squares is to have your numbers picked at the end of a quarter, half, or game.

For example, the New Orleans Saints are playing the Tampa Bay Buccaneers and the Saints are leading 10-7 at the end of the first quarter.

In our \$1 buy-in example, the total pot would be worth \$100.
