Regardless of what type of business you own, Yelp reviews and other popular revi ews platforms have the power to make or break your online reputation. Since its creation in 2004, approximately 184 million reviews have been logged on Yelp. Wh en your potential customer is looking for insider information about your restaur ant, beauty salon, or car dealership, Yelp is often their first stop. This makes it an essential tool for business owners who want to make a good impression-and for those who need to actively fight a not-so-stellar online reputation.

More Reviews. More Business.

Maybe your business gets consistently flattering 5-star ratings, but you had a b ad apple employee who caused some damage by being rude to customers. One bad day in business can mean a scathing Yelp review that leaves a scar in your online r eputation. While you will want to immediately respond to the poor review and mak e it right with the customer, they may still never change their review. In this case, you can buy positive reviews to bury the atypical negative review. If You've Inherited Many Negative Reviews

1. Wasting Your Money If Yelp's algorithm suspects that a review is not genuine, it automatically bumps the review to the second page, where customers will not likely see it. Thi s is disappointing and a complete waste of your money.

Send out text messages after each transaction asking for feedback and reviews on

Identifying and removing fake reviews can be a time-consuming process, but it is important for maintaining the integrity of your business's Yelp page. To id entify fake reviews, look for language that is overly positive or negative, revi ews with few or no details about the actual experience, language that is unchara cteristic of normal customer comments, and multiple 5-star or 1-star reviews in a short period of time.
